KUMARAKOM

Temporary Buildings are those which are provided to serve the purpose temporarily for a short period and with easily perishable materials and without proper masonry foundations and superstructure. Usually such structures are buildings of bamboo, jungle wood, mud, radjans or grass thatching provided. (katcha structures)

Semi-permanent Buildings. These structures are those provided with masonry foundations and superstructure but provided with jungle wood or cheaper variety for wood work for roof work and generally roofed with coconut leaf. The type of construction is such that the structure can be made permanent with suitable alterations such as providing permanent roofs, doors and windows etc.

In certain cases, materials employed for roof work can be dismantled and routed in other locality such as buildings provided with masonry foundations and dwarf walls and partitions for room but roofed over with corrugated metal trusses with A.C. or C.C.I sheets which could be dismantled and routed.

Permanent Structures are those built with an
